

ODOO | FIELD SERVICE MANAGEMENT

Deliver excellent services
to your customers everywhere.

Focus on what you do best

When you are onsite, what matters is that you deliver excellent services. Your tools need to be intuitive and as mobile as you are.

Schedule your Appointments 	Assign tasks to employees 	Plan your route 	Track your working time 
Sell products 	Design custom worksheets 	Invoice your services 	Provide quotations 

Manage your workdays from anywhere, on any device.

Odoo works on any device connected to the internet and has been designed with mobile devices in mind. There is no need to install any software nor worry about device compatibility. Just open your web browser and get your work done!

Odoo Field Service Management Features

Clean and Fast

All-in-one

All the tools you need are gathered in a single app. No need to switch from one app to another at each step of your workflow.

Mobile

Manage everything easily on the move, from a single app, everywhere.

Reduce data entry

Field Service is connected to many other Odoo apps and makes your data entry easier and faster. Automate more, save time.

User-Driven Development

The app displays only the data you need and helps you keep your focus on what truly matters: providing top-notch services to your customers.

Modern User Interface

A fast user interface designed for modern project management. Get all the information you need wherever you need it.

Tasks

Multi-project

Create as many projects as you want to organize your tasks, define specific settings for each project, and get separate reports. This feature is particularly useful to manage multiple teams or locations.

Kanban View

The default kanban view helps you stay organized by giving you a clear overview of your tasks, grouped however you want them to be

Time Tracking

Track your working time directly from the task's menu with the integrated timer, and invoice it automatically.

Map view

View your next appointments on a map, get more information by clicking on a task, and directly find the itinerary.

Planning

Planning

Organize all the tasks and make sure the employees' shifts are correctly planned.

Day, week, month view

Display your schedule in Gantt and Calendar views by day, week, or month.

Unassigned tasks

Manage unassigned tasks easily and assign them with a simple drag-and-drop.

Avoid conflicts

You get a warning if multiple tasks are scheduled at the same time for an employee.

Reporting

Tasks Analysis

Create all kinds of reports for your tasks, based on the measures, filters, and time ranges that you want.

Graphs

Use beautiful bar charts, line charts, or pie charts to display your reports.

Worksheets Analysis

Get reports based on the worksheet templates used in the reports.

Pivot Table Analysis

Create advanced pivot tables and export the data in .xls files to open it in other programs.

Sales

Fast quotations

Create a polished quote in seconds. Use predefined products, price lists, payment terms, and quotation templates.

Sign

Your customer can sign the reports directly from the mobile app.

Instant Invoices

Create draft invoices directly from the task's form, prefilled automatically with the tracked working time and all the products.

Customizable worksheets

Design your worksheet templates with all the fields that you need to provide your customers with detailed reports.

Add products

Add salable products with a single tap.

Customer Portal

View and manage, tasks, quotations, and invoices through the customer portal.
