Real-time Overview

Manage everything from a single place.

Keep an eye on the availability of your products and serial numbers from a Gantt view. Need to maintain or check your products' quality? Keep them unavailable in-between two rentals with padding time.

Odoo Rental Features

Rent More Efficiently

Modern User Interface

An intuitive and responsive user interface to get all the information you need.

Gantt Scheduling

Have an overview of your rented products for the upcoming days/weeks. Keep an eye on which products you can still rent and when.

Reduced Data Entry

Create rental orders and invoices in a few clicks. Do everything, such as managing deliveries and returns from the same screen.

Products & Prices

Product Stock

Rent in bulk or based on serial numbers.

Pricelists

Manage several prices for your products (time-bounded, min quantity, discounts) and assign them to your customers.

Units of Time

Rent products in multiple units of time like days, weeks or months. Adapt your price based on your unit of time.

Delay Costs

Compute delay costs based on extra hours, days or more.

Sales Orders

Product Configurator

Configure and rent your products by easily selecting your product attributes.

Online Approval

Rent faster with electronic signatures, allowing your customers to review and sign your rental orders online. Get signatures on contracts or any PDF document with the Odoo eSign app.

Cross-Selling

Rental orders are optimized to help your company maximize revenues by offering options (e.g. insurance, delivery).

Online Payments

Get paid online before confirming rentals.

Follow Up

Tracking

Easily follow the status of each item in the order (reserved, delivered, returned, invoiced).

Email Gateways

See all of your email communications attached to the associated order, allowing you to trace back on discussions and negotiation.

Invoicing

Invoice on orders. Manage payment terms by customers or by invoice. Track and follow up on invoices.

Reporting

Order & Invoicing Analysis

Drill down sales and invoicing data by product, serial number, product category, customer, period, etc. Perform accurate reporting and efficient decision making.
