

## ODOO | RECRUITMENT

### Hiring Processes Made Easy

**Manage your hiring process**  
Organize your vacancies and job applications

Set up your job board, promote your job listings and easily keep track of submitted applications. Follow every applicant and build a database of skills and profiles with indexed documents. No need to outsource your recruitment - handle everything internally in a simple and professional way.

**Track job offers straight from the app**  
See which channel drives most applications and gather all of them in Odoo.

A new email address is automatically assigned to every job offer in order to route applications directly to the right one.

Whether applicants contact you by email or using an online form, get all the data automatically indexed (resumes, cover letters, etc.) and answered in just a click, using templates or personalized emails.

Jobs Sources

CREATE IMPORT

Source	Email	Uri Parameters

# Odoo Recruitment Features

## Manage

### Job offers

Post job offers on your website and follow the application process within the Kanban view

### Employment websites

Link job offers from different employment websites to your module and keep an eye on all your offers

### Recruitment process management

Manage a pipeline of candidates for your open positions and get organized with smart activities management

### Backend

Manage everything from application emails to automatic answers right from the app

### Candidacies

Keep track of all your applicants

### Automatic indexation

Create a repository with all your applicants' resumes, well organized and instantly accessible

### Calendar integration

Schedule interviews and send meeting invites directly from Odoo and synchronise your Odoo calendar with Google Calendar.

## Hire

### Send online offers

Generate offer links for the selected candidates. Let them review the offer, upload their personal information and sign the offer

### Salary configurator

Let your employees build their own benefits package: gross salary, time off, meal voucher, etc.
