Be Proactive

For professionals who like to plan their activities at the beginning of the day - Use the Day Planner to allocate your time in advance to the day's tasks.

Every minute counts

For professionals who need to track their work in detail - Launch the timer from your desktop in a single click. Just choose your task and switch it on.

Focus on what matters

For professionals who bill per hour or day - Just focus on your work and record your activities at the end of your day.

Odoo Timesheet Features

Track Your Working Time

Fast and easy input

Choose to log your activities at the beginning of the day, on the fly or after your work is done.

Launch tasks in one click

With our Chrome extension, you are always one click away from your time-tracking app. Just click on "Start" to launch your tasks.

Grid view

Record your timesheets and your forecasts super quickly with the grid view. As a manager, you see immediately who's working on what.

Easily manage your activities of the day

Select your recurring tasks in one click to add them to your activities of the day. Work faster by setting up a default project and minimal duration.

Get useful statistics

Quickly overview your time spent on tasks per day or per week.

Mobile

Start and pause a timesheet from your phone thanks to our the mobile App Odoo Awesome Timesheet.

Work Offline

Offline tracking mode

Your tasks will keep running no matter where you are, even if internet connectivity is not available.

Synchronization

Hours tracked offline are synced to your account once you're back online.

Manage Your Employees

Create and assign projects

Organize your employees workload by assigning them tasks and projects.

Grant access rights

Managers can allow or restrict backend access to their employees in a few clicks.

Approve timesheets

Get an overview of your employees timesheet and approve them.

Timesheet control

Activate a periodical email reminder for timesheet users to create a timesheet or to approve it for managers.

Overview employee's activities

Monitor your employees performances by project or by task.

Reporting

Timesheet analysis

Get statistics about billable hours, billable amount, invoiced amounts, etc.

Leave management

Leaves can be automatically integrated within timesheet for better control of the time spent.

Timesheet profit

Easily review your employee's performance by measuring the profitability of their projects.
